COMMUNIGATE PRO LIFELINE

·····

San Francisco - Berlin - Moscow - Tokyo

IT ALL STARTED HERE

1991

The company was established in Cologne Germany - it initially developed computer sharing technologies "IP over Ethernet"

1994

First versions of CommuniGate designed for the Mac OS becoming the leading product in educational markets. Company HQ moved to San Francisco

1997-2000

CommuniGate became "Pro" with support for all Unix based systems with unlimited scalability. CGatePro became the leading ISP email and collaboration server with un-matched performance records thru SPEC.org

2008

CommuniGate Pro adds full groupware capabilities with ActiveSync and file sharing and the new SIP protocol for VoIP

2010

As was the case with e-mail the CGatePro platform sweeps all performance tests for SIP and real-time signaling performance testing making it the un-contested market leader for extreme scaling

2015

CommuniGate Pro business applications are launched with "Contact Center" a fully web based solution to manage customer care
